

Welcome back to Criminology!

This year you will complete your unit 3 controlled assessment – Crime Scene to court room. You will also complete your unit 4 exam – Crime and punishment. Both offer you an understanding of how the criminal justice system works and it's potential limitations.

Units 3 & 4

In unit 3 you will study the forensic and evidence side of the criminal justice system. This includes looking at the process of collecting and storing evidence, and the impact of mistakes and human error during this process.

You will research several case studies during this unit. You will also gain an understanding of the rights of individuals in the criminal justice system and the potential impacts when these are not met.

In unit 4 you will study the people in the criminal justice system, including their role, how they work together, their strengths and weaknesses and also factors that impact their ability to do their jobs. You will also consider questions such as, what's the point of punishment? Does prison work? Do other places around the world have systems that work better than ours?

Unit 3 Controlled Assessment:
23rd and 24th
November.

Unit 4 Exam:
28th May.

Student Success:
